New low-cost phone service

Mobile phone users will be able to save on roaming charges and SMS with the launch of FSBM Holdings Bhd's low cost mobile phone software solution called UNOS PRO.

"We are offering what the telcos can't or won't offer to the mobile users around the world," chief executive officer of FSBM's multimedia and communication unit, Michael Ta said.

He said that there are currently 35,000 subscribers worldwide for UNOS PRO with the majority from Malaysia.

The service offers IDD savings of 30-50 per cent and 85 to 92 per cent savings for roaming calls – Bernama.
